It also has Robert Englund fingerprints all over it. At the time he does not seem to be aware of P005070 and Shaĝan's significance in the region. Not to mention his multi talents.

Apparently many of Englund’s proto cuneiform tablets had been cloistered away in a private collection for decades from the ’1920s to the 80s when Bob finally got his hands on them. Ironically, maybe they are safer that way – see efforts of McGuire Gibson (who was on the ’63 expedition that uncovered our beloved □□ Eshdam Tablet) following the King Bush I & II Iraq invasions over prophetically, oil » wikipedia.org/wiki/Archaeological_looting_in_Iraq
